WORK EXPERIENCE

Frontend Developer

Private company

2024 - Present

- Build production interfaces with Nuxt and React.js.
- Integrate frontend features with Node.js services and APIs.
- Maintain reusable UI patterns and application performance.

Frontend Engineer / Software Developer

Private company

Dec 2022 - 2024

- Led frontend architecture for production Vue.js and Nuxt applications.
- Built API-connected screens with maintainable UI patterns.
- Improved stability through bug triage, refactoring, maintenance, and performance-focused implementation.

Software Developer

Private company

Jan 2020 - Dec 2022

- Contributed to 3 production Vue.js projects for enterprise, university, and government use cases.
- Implemented frontend features from requirements and integrated REST APIs.
- Built reusable custom components aligned with project design systems.

iOS Developer

Private company

Sep 2019 - Jan 2020

- Developed Swift application features using programmatic UIKit.
- Supported bug fixing, maintenance, testing, and iterative product refinement.

SELECTED PROJECTS

Enterprise Management System

Vue.js · Vuetify · TypeScript

Led production UI work for complex management workflows and reusable enterprise components.

EV Station KH

Next.js · NestJS · PostGIS

Charging station locator concept with map-first search, station status, and mobile companion flow.
